

Empower your staff and protect students.

ALICE is a comprehensive, multi-tiered certification-based training program that prepares staff to participate in their own survival during an active shooter incident and mitigate risk for your school. Organizations implement ALICE training using a blended model to ensure retention and compliance as well as increase situational awareness and fluency.

Empower

Staff Training

Your staff accesses our e-Learning courses which demonstrate how to participate in your own survival in an active shooter event. This module sets the foundation for the ALICE strategies. Staff will have the opportunity to re-certify annually to ensure retention and compliance.

Protect

On-site Training

On-site drills lead by an ALICE Certified Instructor (ACI). These drills are key to carrying out ALICE protocols without hesitation under stress. Your certified instructor will run drills unique to your setting to increase situational awareness and fluency.

Mitigate

Organizational Certification

Mitigate legal and financial risk through implementing best practices. You will receive a customizable set of policies from us to help properly document your active shooter preparedness. These documents ensure your compliance with Federal guidelines.

Start online. Finish on-site.

Blended learning is that perfect combination of our online e-Learning content and hands-on skills sessions. ALICE Certified Instructors spend less time in the classroom and more time focusing on scenarios and drills with your staff. Learners come to the hands-on drills already prepared with a foundation of ALICE strategies from our e-Learning, which ensures retention and confirms quality standards have been met.

Call today for more information: (330) 661-0106.

e-Learning

The e-Learning is the first step in staff training. It builds the foundation and understanding of why and how for your team. Our e-Learning is interactive and takes approximately 1 hour to complete. Studies have found this to be the quickest and most effective way to get an understanding of the ALICE strategies. This e-Learning functions as a first step to increasing survivability in a violent intruder situation and meeting Federal guidelines.

Training

This on-site hands-on training done by an ALICE Certified Instructor teaches your staff how to apply the concepts learned in the e-Learning while creating situational awareness and fluency. Your staff will understand what to do in your unique setting. Your ACI will run interactive scenarios with your staff to ensure retention. This hands-on training blended with the e-Learning is the strongest form of learning based on the Department of Education study.

Organization Certification

We assign you an ALICE Implementation Specialist who will help you customize ALICE to your organization based on current policies, infrastructures and technologies. We provide you with an implementation guide which includes templates and guidance to limit liability. These documents help ensure your compliance with Federal guidelines recommended by the Department of Education Readiness and Emergency Management for Schools (REMS).
